

DIGITALNESS CRM – COMPLETE STRUCTURE

☐ CORE MODULES (Your CRM should have these)

1. Lead Management & Sales Pipeline
2. Client Management & Project / Work Management, Task Allocation System
3. Employee Management
4. Payment & Billing
5. Client Communication Portal
6. Reports & Analytics
7. Multi-Branch Control System

1. COMPLETE FLOW (BIG PICTURE)

☞ Your CRM should follow this exact journey:

Lead Capture → Lead Qualification → Sales Pipeline → Proposal → Closure → Client Creation

☐ 2. LEAD CAPTURE SYSTEM (ENTRY POINT)

⬇ Input Sources:

- Meta Ads Leads
 - Google Ads Leads
 - Website Forms (Digitalness.co.in)
 - WhatsApp
 - LinkedIn
 - Manual Entry
-

☐ Lead Form Fields (Mandatory Inputs)

Every lead must have:

- Lead ID (Auto-generated)
 - Name
 - Company Name
 - Phone
 - Email
 - City (Bangalore / Vizag / Hyderabad)
 - Service Interested:
 - Meta Ads
 - Google Ads
 - Website
 - SEO / GMB
 - Social Media
 - Budget Range
 - Lead Source
 - Date Created
-

Automation:

 As soon as lead enters:

- Auto assign to **salesperson based on city**
 - Auto send **WhatsApp welcome message**
 - Create **Follow-up task**
-

3. LEAD QUALIFICATION SYSTEM

Purpose:

Filter serious vs time-waste leads

Qualification Fields:

- Requirement clarity (Clear / Not clear)
- Budget match (Yes / No)
- Timeline (Urgent / Normal / Later)
- Decision Maker? (Yes / No)

☐ Lead Scoring (Important)

Assign score:

- Hot Lead 🔥 (Ready to close)
- Warm Lead 😊
- Cold Lead ❄️

✈️ Action:

☞ Only **Hot & Warm** go to pipeline

☞ Cold leads → nurture (later follow-up)

🔄 4. SALES PIPELINE (CORE SYSTEM)

This is your **main dashboard for closing deals**

🏠 Pipeline Stages (Must Have)

1. New Lead
2. Contacted
3. Discovery Call Done
4. Qualified
5. Proposal Sent
6. Negotiation
7. Closed Won ✓
8. Closed Lost ✗

☐ Each Deal Must Have:

- Deal ID

- Linked Lead
 - Service Package
 - Deal Value (₹)
 - Probability (%)
 - Expected Closing Date
 - Assigned Salesperson
 - Branch
-

Features:

- Drag & drop pipeline (like cards)
 - Notes & call logs
 - Follow-up reminders
-

5. SALES ACTIVITY TRACKING

Inputs:

- Call logs
 - Meeting notes
 - WhatsApp conversations
 - Email tracking
-

Features:

- “Next Follow-up Date”
 - Reminder notifications
 - Daily task list for sales team
-

6. PROPOSAL MANAGEMENT SYSTEM

■ Proposal Inputs:

- Client Name
 - Services Included:
 - Meta Ads
 - Google Ads
 - Website
 - Creatives
 - Pricing
 - Duration
 - Deliverables
-

Features:

- Pre-built proposal templates
 - PDF generation
 - Send via email/WhatsApp
 - Status:
 - Sent
 - Viewed
 - Accepted
 - Rejected
-

□ 7. DEAL CLOSURE SYSTEM

When deal is WON:

☞ CRM should automatically:

- Convert Lead → Client
 - Create Client Profile
 - Create Project
 - Generate Invoice
-

When LOST:

- Capture reason:

- Price
- No response
- Competitor
- Not interested

💡 This helps improve strategy

8. MULTI-BRANCH MANAGEMENT

System should track:

- Leads per branch
 - Sales per branch
 - Conversion rate per branch
-

Auto Assignment Logic:

- Bangalore lead → Bangalore sales team
 - Vizag lead → Vizag team
-

Admin View (YOU):

🔑 One dashboard:

- Total revenue
 - Branch-wise performance
 - Top salesperson
-

9. SALES TEAM MANAGEMENT

Each Salesperson Dashboard:

- Assigned leads

- Pipeline deals
 - Follow-ups today
 - Conversion rate
-

Performance Tracking:

- Deals closed
 - Revenue generated
 - Lead response time
-

10. AUTOMATIONS (VERY IMPORTANT)

Must Automations:

- Lead comes → Assign sales
 - No response in 24 hrs → Reminder
 - Follow-up missed → Alert
 - Proposal sent → Reminder after 2 days
 - Deal won → Auto onboarding
-

11. REPORTS (OWNER LEVEL)

You should see:

- Total Leads
 - Conversion Rate (%)
 - Revenue
 - Cost per lead
 - Best performing source
 - Branch-wise comparison
-

12. ROLE-BASED ACCESS

- Admin → Full control
 - Sales Manager → Branch data
 - Salesperson → Only their leads
-

REAL-TIME WORKFLOW (EXAMPLE)

☞ Lead comes from Meta Ads (Bangalore)

1. Auto enters CRM
 2. Assigned to Bangalore sales
 3. Sales calls → updates status
 4. Moves to “Qualified”
 5. Proposal sent
 6. Negotiation
 7. Closed Won
 8. Client created automatically
-

IMPORTANT ADVICE (FROM EXPERIENCE)

- ✗ Don't make CRM complicated
- ✗ Don't skip automation

- ✓ Keep UI simple
 - ✓ Make pipeline visual
 - ✓ Track follow-ups strictly
-

FINAL SUMMARY

Your CRM Sales System =

- ☞ Lead Capture
- ☞ Qualification
- ☞ Pipeline
- ☞ Proposal
- ☞ Closure
- ☞ Branch Tracking
- ☞ Automation
- ☞ Reports

BIG FLOW (CLIENT → WORK → TEAM → DELIVERY)

☞ Your system should follow this exact chain:

Client Created → Services Selected → Project Created → Tasks Generated → Assigned to Team → Work Updates → Client Visibility

1. CLIENT MANAGEMENT SYSTEM

Purpose:

Store and manage **all client data + services + lifecycle**

CLIENT MASTER PROFILE (Inputs)

Every client must have:

- Client ID (Auto)
 - Client Name
 - Company Name
 - Contact Person
 - Phone / Email / WhatsApp
 - Business Type (Interior / Real Estate / Clinic / etc.)
 - City / Branch (Bangalore / Vizag / Hyderabad)
-

SERVICES MAPPING (IMPORTANT)

Multi-select services:

- Meta Ads
 - Google Ads
 - Social Media Management
 - Creatives (Design)
 - Website Development
 - SEO / GMB
-

COMMERCIAL DETAILS

- Package Type (Monthly / One-time)
 - Monthly Retainer (₹)
 - Start Date
 - Renewal Date
 - Payment Cycle (Monthly / Quarterly)
 - Assigned Account Manager
-

CLIENT STATUS

- Active
 - On Hold
 - Completed
 - Cancelled
-

FILE STORAGE

- Agreements
 - Proposals
 - Creatives
 - Reports
-

⚙️ 2. PROJECT / WORK MANAGEMENT SYSTEM

☞ This is your **execution engine**

🚀 STRUCTURE (VERY IMPORTANT)

Client → Services → Projects → Tasks → Subtasks

☐ PROJECT CREATION (AUTO)

When deal is closed:

☞ CRM should automatically create:

- Project Name
 - Linked Client
 - Selected Services
 - Start Date
 - Assigned Team
-

📁 SERVICE-WISE PROJECT SPLIT

Each service becomes a mini project:

Example:

Client: ABC Interiors

Projects:

- Meta Ads Project
 - Creative Design Project
 - Website Project
-

□ 3. TASK MANAGEMENT SYSTEM

✦ Task Creation (Auto + Manual)

For each service, predefined tasks should be created:

Example: Meta Ads Service

Tasks:

- Competitor Research
 - Campaign Strategy
 - Ad Copy Writing
 - Creative Design
 - Campaign Setup
 - Optimization
 - Weekly Reporting
-

Example: Social Media

Tasks:

- Content Calendar
 - Post Design
 - Reel Creation
 - Caption Writing
 - Posting
-

□ TASK INPUT FIELDS

- Task ID
- Task Title
- Client Name
- Service Type
- Assigned Employee
- Priority (High / Medium / Low)
- Deadline
- Status:
 - Pending

- In Progress
 - Completed
 - Revision
 - Attachments
 - Notes
-

4. TASK ALLOCATION SYSTEM (SMART LOGIC)

Auto Assignment Logic:

If:

- Meta Ads → Performance Marketer
 - Google Ads → Ads Specialist
 - Creatives → Graphic Designer
 - Website → Developer
-

Work Distribution Control:

- Limit tasks per employee
 - Avoid overload
 - Balance team workload
-

Manual Override:

Manager can reassign tasks anytime

5. WORKFLOW AUTOMATION (VERY IMPORTANT)

When Client is Created:

☞ System should:

1. Create project
 2. Create service-wise tasks
 3. Assign tasks automatically
 4. Set deadlines
 5. Notify team
-

When Task Starts:

- Status → “In Progress”
 - Employee adds updates
-

When Task Completed:

- Upload files
 - Mark complete
 - Notify manager
-

6. WORK UPDATE SYSTEM

Employee Side:

Each task update must include:

- Progress note
 - File upload (design/report/link)
 - Time spent
 - Status update
-

Manager Side:

- Review work
 - Approve / Request revision
-

7. CLIENT VISIBILITY SYSTEM (VERY POWERFUL)

Client Login Dashboard Shows:

- Active services
 - Task progress
 - Completed work
 - Upcoming work
 - Reports
-

Visual Indicators:

- % completion
 - Timeline progress
 - Recent updates
-

Client Actions:

- View updates
 - Download files
 - Request changes
 - Raise support tickets
-

8. COMMUNICATION TRACKING

Track everything:

- WhatsApp chats

- Emails
 - Call notes
-

Link communication to:

- ☞ Client
 - ☞ Project
 - ☞ Task
-

☐ 9. DEADLINE & SLA MANAGEMENT

System should:

- Track deadlines
 - Send reminders before due date
 - Highlight overdue tasks
-

SLA Example:

- Creative design → 2 days
 - Campaign setup → 3 days
-

▮ 10. PERFORMANCE TRACKING

Employee Metrics:

- Tasks completed
 - On-time delivery %
 - Pending tasks
-

Client Metrics:

- Active projects
 - Revenue
 - Work completion rate
-

11. MULTI-BRANCH CONTROL

Each task & client tagged with:

- Branch
-

You (Admin) can see:

- Branch-wise workload
 - Team performance
 - Revenue
-

12. ROLE-BASED ACCESS

- Admin → Full access
 - Manager → Branch control
 - Employee → Only assigned tasks
 - Client → Only their work
-

13. NOTIFICATIONS SYSTEM

- Task assigned
 - Task updated
 - Deadline reminder
 - Client message
 - Approval required
-

💡 REAL WORKFLOW (EXAMPLE)

☞ Client takes:
Meta Ads + Creatives

1. Client created
 2. System creates:
 - Meta Ads Project
 - Creative Project
 3. Tasks auto-created:
 - Campaign setup
 - Ad creatives
 4. Assigned to:
 - Marketer
 - Designer
 5. Work starts → updates added
 6. Manager reviews
 7. Client sees updates in portal
-

💧 IMPORTANT ADVICE (FROM REAL AGENCIES)

- ✗ Don't manage work on WhatsApp
- ✗ Don't depend on manual tracking

- ✓ Everything inside CRM
 - ✓ Every task tracked
 - ✓ Client visibility = trust + retention
-

🎯 FINAL STRUCTURE

Client → Services → Projects → Tasks → Team → Updates → Approval → Client View

BIG FLOW (EMPLOYEE SYSTEM)

☞ Your CRM should manage employees like this:

Employee Added → Role Assigned → Tasks Given → Work Tracked → Performance Measured → Salary Linked

1. EMPLOYEE MASTER MANAGEMENT

Purpose:

Store complete employee data + role + branch

☐ EMPLOYEE PROFILE (Inputs)

Every employee must have:

- Employee ID (Auto-generated)
- Full Name
- Phone Number
- Email
- Role:
 - Sales Executive
 - Performance Marketer
 - Graphic Designer
 - Video Editor
 - Web Developer
 - Account Manager
- Department:
 - Sales
 - Marketing
 - Creative
 - Tech
- Branch:
 - Bangalore
 - Vizag
 - Hyderabad
- Joining Date
- Salary
- Employment Type (Full-time / Freelance / Intern)

Status:

- Active
- On Leave
- Inactive

2. ROLE-BASED ACCESS SYSTEM (VERY IMPORTANT)

Access Control:

Admin (You)

- Full access (all branches, all data)

Branch Manager

- Access only their branch

Employee

- Can only see:
 - Assigned tasks
 - Their projects

💡 This avoids confusion + data leakage

3. TASK ASSIGNMENT SYSTEM (CORE)

🔗 This connects Employee ↔ Work

Task Inputs (Linked to employee)

- Task ID
 - Task Title
 - Client Name
 - Service Type
 - Assigned Employee
 - Deadline
 - Priority
-

Task Status:

- Pending
 - In Progress
 - Completed
 - Revision
-

Assignment Logic:

 Auto assign based on role:

- Meta Ads → Performance Marketer
 - Creatives → Designer
 - Website → Developer
-

Manual Override:

Manager can reassign anytime

☐ 4. WORK TRACKING SYSTEM

Employee Updates:

Each employee must update:

- Work status
 - Notes
 - File uploads
 - Time spent
-

Example:

Task: Instagram creatives

Employee updates:

- “3 designs completed”
 - Uploads files
 - Marks progress
-

☐ **5. ATTENDANCE & AVAILABILITY (OPTIONAL BUT USEFUL)**

Inputs:

- Login time
 - Logout time
 - Working hours
-

Status:

- Present
 - Absent
 - On Leave
-

 Helps track productivity

6. PERFORMANCE MANAGEMENT SYSTEM

 This is where you control quality

Metrics per employee:

- Tasks assigned
 - Tasks completed
 - On-time completion %
 - Delayed tasks
 - Revisions count
-

☐ Advanced:

- Client satisfaction rating
 - Work quality score
-

7. KPI DASHBOARD (FOR YOU)

You should see:

- Top performing employees
 - Least performing employees
 - Workload per employee
 - Efficiency %
-

8. WORKLOAD MANAGEMENT

System should:

- Show number of tasks per employee

- Prevent overload
-

Example:

Designer A → 15 tasks ✕
Designer B → 5 tasks

☞ CRM should balance automatically

9. NOTIFICATION SYSTEM

Employees should get alerts for:

- New task assigned
 - Deadline reminder
 - Revision request
 - Manager comment
-

10. SALARY & PAYOUT TRACKING

Inputs:

- Salary amount
 - Payment date
 - Bonus / Incentives
-

Optional Advanced:

- Performance-based incentives
 - Sales commission tracking
-

☐💻 11. EMPLOYEE DASHBOARD (VERY IMPORTANT)

Each employee should see:

- Today's tasks
 - Pending tasks
 - Deadlines
 - Notifications
 - Performance stats
-

☐💼 12. MANAGER DASHBOARD

Branch manager should see:

- Team performance
 - Task status
 - Delays
 - Employee workload
-

🏢 13. MULTI-BRANCH EMPLOYEE CONTROL

CRM must track:

- Employees per branch
 - Performance per branch
 - Work distribution
-

You (Admin) View:

🔗 One screen:

- Bangalore team
 - Vizag team
 - Hyderabad team
-

14. EMPLOYEE WORKFLOW (REAL EXAMPLE)

 Client project starts

1. CRM creates tasks
 2. Tasks assigned to employees
 3. Employee gets notification
 4. Starts work → updates progress
 5. Completes → uploads files
 6. Manager reviews
 7. Client sees output
-

IMPORTANT RULES (VERY IMPORTANT)

- ✗ No work outside CRM
- ✗ No “I forgot task” excuses

- ✓ Every task assigned
 - ✓ Every update tracked
 - ✓ Every delay visible
-

FINAL STRUCTURE

Employee → Role → Tasks → Updates → Performance → Salary

💡 PRO TIP (FOR DIGITALNESS SCALE)

Start simple:

Phase 1:

- Employee profiles
- Task assignment
- Status tracking

Phase 2:

- Performance dashboard
- Workload balancing

Phase 3:

- Incentives + automation

BIG FLOW (PAYMENT SYSTEM)

📄 Your CRM should follow this exact flow:

Client Created → Plan/Package → Invoice Generated → Payment Tracking → Reminders → Reports

💰 1. BILLING SETUP (FOUNDATION)

🚀 Purpose:

Define how you charge clients

☐ BILLING TYPES (Must Support)

- Monthly Retainer (Most common)
- One-Time Project (Website, Branding)
- Custom Package

Inputs:

- Client Name
- Services Taken
- Pricing per service
- Total Amount
- GST (%)
- Billing Cycle:
 - Monthly
 - Quarterly
 - One-time
- Payment Terms:
 - Advance
 - 50-50
 - Post-service

2. CLIENT BILLING PROFILE

Each client should have:

- Billing Name
- GST Number
- Billing Address
- Payment Method:
 - UPI
 - Bank Transfer
 - Payment Gateway
- Credit Period (e.g., 7 days / 15 days)

3. INVOICE MANAGEMENT SYSTEM

Invoice Creation

 Auto + Manual

☐ Invoice Fields:

- Invoice Number (Auto)
 - Client Name
 - Services Included
 - Amount
 - GST
 - Total Payable
 - Issue Date
 - Due Date
 - Status:
 - Paid
 - Pending
 - Overdue
-

⚙ Automation:

- Monthly clients → Auto-generate invoice
 - Send via:
 - Email
 - WhatsApp
-

📅 4. PAYMENT TRACKING SYSTEM

⬇ Inputs:

- Invoice Linked
 - Amount Paid
 - Payment Date
 - Payment Method
 - Transaction ID
-

📊 Status:

- Fully Paid
- Partially Paid

- Pending
-

Example:

₹50,000 invoice

Paid ₹25,000 → Status = Partial

5. PAYMENT REMINDER SYSTEM (VERY IMPORTANT)

Automation Rules:

- Before Due Date → Reminder
 - On Due Date → Alert
 - After Due Date → Overdue notice
-

Channels:

- WhatsApp
 - Email
 - SMS (optional)
-

Message Example:

“Hi, your invoice of ₹50,000 is due tomorrow. Kindly process payment.”

6. REVENUE TRACKING DASHBOARD

You should see:

- Total Revenue
 - Monthly Revenue
 - Branch-wise Revenue
 - Paid vs Pending
 - Overdue Amount
-

7. MULTI-BRANCH BILLING SYSTEM

CRM must track:

- Revenue per branch
 - Payments per branch
 - Outstanding per branch
-

Example:

- Bangalore → ₹5L
 - Vizag → ₹2L
-

8. RECURRING BILLING SYSTEM (IMPORTANT)

For Monthly Clients:

☞ CRM should:

- Auto-generate invoice every month
 - Send automatically
 - Track payment
-

Inputs:

- Start Date
 - Billing Cycle
 - Next Billing Date
-

9. EXPENSE TRACKING (OPTIONAL BUT POWERFUL)

Inputs:

- Office rent
 - Salaries
 - Ad spend
 - Tools (software)
-

Purpose:

☞ Know profit per branch

10. PROFIT & LOSS VIEW

System should show:

- Revenue
 - Expenses
 - Net Profit
-

☐ 11. RECEIPTS SYSTEM

After payment:

☞ CRM should generate:

- Payment receipt
 - Share with client
-

12. ACCESS CONTROL

- Admin → Full financial data
 - Manager → Branch data
 - Employee → No access (or limited)
-

13. INTEGRATION OPTIONS (ADVANCED)

- Payment Gateway (Razorpay / Stripe)
 - Auto payment confirmation
 - Bank reconciliation
-

14. COMPLETE WORKFLOW (REAL EXAMPLE)

☞ Client takes Meta Ads (₹30,000/month)

1. Client created
 2. Billing cycle set (monthly)
 3. Invoice auto-generated (1st of month)
 4. Sent via WhatsApp/email
 5. Due date (5th)
 6. Payment received → updated
 7. Receipt generated
-

IMPORTANT RULES (VERY IMPORTANT)

- ✗ Don't track payments manually
- ✗ Don't forget follow-ups

- ✓ Every invoice in CRM
 - ✓ Every payment tracked
 - ✓ Every overdue followed
-

FINAL STRUCTURE

Client → Billing Setup → Invoice → Payment → Reminder → Reports

PRO TIP (FOR DIGITALNESS SCALE)

Start with:

Phase 1:

- Invoice
- Payment tracking
- Reminders

Phase 2:

- Recurring billing
- Dashboard

Phase 3:

- Profit tracking
- Full automation

BIG FLOW (CLIENT COMMUNICATION SYSTEM)

☞ Your CRM should handle communication like this:

Client Login → View Work → Raise Request → Team Responds → Track Status → Close

🖥️ 1. CLIENT LOGIN PORTAL (ENTRY POINT)

📌 Purpose:

Give clients a **private dashboard** to see everything

🔑 Login Inputs:

- Email / Phone
 - Password / OTP
-

🏠 CLIENT DASHBOARD (HOME SCREEN)

Client should see:

- Active Services
 - Work Progress (%)
 - Recent Updates
 - Pending Tasks
 - Completed Tasks
 - Payment Status
-

- 💡 This reduces:
 - ✗ “What’s the update?” calls
 - ✓ Gives transparency
-

2. SERVICE-WISE VIEW

Each service should be separate:

Example:

Client Dashboard:

- Meta Ads
 - Google Ads
 - Social Media
 - Website
-

Inside Each Service:

Client can see:

- Tasks list
 - Status (Pending / In Progress / Completed)
 - Timeline
 - Files (creatives, reports)
-

3. WORK UPDATE SYSTEM

 **Employee Updates:**

Every update should include:

- Task progress
- Notes
- File upload (design/report)

- Date & time
-

Client View:

Client sees:

- Latest updates
 - Files preview/download
 - Completion status
-

 Example:

“Campaign setup completed. Ads will go live tomorrow.”

4. CLIENT COMMUNICATION PANEL (CHAT SYSTEM)

Must Have:

- Real-time chat OR thread-based messages
-

Features:

- Client ↔ Account Manager chat
 - Attach files
 - Mention team member (@designer)
 - Time-stamped messages
-

Structure:

- Chat linked to:

- Client
 - Project
 - Task
-

5. SUPPORT / TICKET SYSTEM

 Replace messy WhatsApp messages

Ticket Inputs:

- Issue Title
 - Description
 - Service Type
 - Priority:
 - High
 - Medium
 - Low
 - Attachments
-

Ticket Status:

- Open
 - In Progress
 - Waiting for Client
 - Resolved
-

Workflow:

1. Client raises ticket
 2. Assigned to team
 3. Team responds
 4. Client notified
 5. Issue resolved
-

6. NOTIFICATION SYSTEM

Client should get alerts for:

- Task updates
 - File uploads
 - Message replies
 - Ticket updates
 - Invoice reminders
-

Channels:

- Portal notifications
 - WhatsApp
 - Email
-

7. FILE SHARING SYSTEM

 **Central storage for:**

- Creatives
 - Reports
 - Ad screenshots
 - Website files
-

Features:

- Folder-wise structure
 - Download option
 - Version history
-

8. REPORTING VIEW (IMPORTANT FOR TRUST)

Client should see:

- Ad performance summary
 - Monthly reports
 - KPIs (leads, clicks, ROI)
-

💡 You can:

- Upload manually
 - Or integrate basic API later
-

9. REVISION / APPROVAL SYSTEM

✈ For Creatives:

Client can:

- Approve design ✓
 - Request changes ↺
-

Inputs:

- Comment
 - Mark specific change
-

Status:

- Pending Approval
- Approved

- Revision Requested
-

□ 10. TIMELINE & PROGRESS TRACKING

Client sees:

- Project timeline
 - Task deadlines
 - Progress bar (%)
-

💡 Example:

Meta Ads Project → 70% complete

□ 11. ACCOUNT MANAGER ASSIGNMENT

Each client should have:

- Dedicated Account Manager
-

Client can:

- Contact directly
 - See manager details
-

12. MULTI-BRANCH COMMUNICATION CONTROL

CRM should:

- Tag client with branch
 - Assign local team
 - Track communication per branch
-

You (Admin):

🔑 Can see:

- All client conversations
 - All branches
-

13. ACCESS CONTROL

- Client → Only their data
 - Employee → Only assigned clients
 - Manager → Branch clients
 - Admin → All
-

14. COMPLETE WORKFLOW (REAL EXAMPLE)

🔑 Client logs in

1. Sees dashboard
2. Checks Meta Ads progress
3. Downloads creatives

4. Requests revision
 5. Raises support ticket
 6. Gets reply from team
 7. Receives notification
 8. Issue resolved
-

IMPORTANT RULES (VERY IMPORTANT)

- ✗ Don't manage clients only on WhatsApp
- ✗ Don't lose communication history

- ✓ Everything inside CRM
 - ✓ Every update visible
 - ✓ Every request tracked
-

FINAL STRUCTURE

Client Login → Dashboard → Services → Tasks → Updates → Chat → Tickets → Files → Reports

PRO TIP (FOR DIGITALNESS BRAND)

If you build this well:

☞ You can position as:
“Premium Digital Marketing Agency with Live Client Dashboard”

This alone can help you:

- 🔥 Close higher-ticket clients
- 🔥 Reduce churn
- 🔥 Look like a big agency

BIG FLOW (REPORTING SYSTEM)

☞ Your CRM should track everything like this:

Leads → Sales → Clients → Work → Payments → Performance → Insights

1. MASTER DASHBOARD (OWNER VIEW – YOUR SCREEN)

Purpose:

One screen to see **entire business health**

☐ You should see:

- Total Leads (Today / Month)
 - Total Revenue
 - Active Clients
 - Conversion Rate (%)
 - Pending Payments
 - Overdue Invoices
-

Branch Comparison:

- Bangalore Revenue
 - Vizag Revenue
 - Hyderabad Revenue
-

 This is your **daily decision dashboard**

□ 2. LEAD ANALYTICS

↓ Track:

- Total Leads
 - Leads by Source:
 - Meta Ads
 - Google Ads
 - LinkedIn
 - Referral
-

▮ Metrics:

- Cost per Lead (CPL)
 - Lead to Conversion %
 - Best performing source
-

✦ Insights:

- ☞ “Meta Ads giving cheaper leads”
 - ☞ “LinkedIn giving high-quality clients”
-

💰 3. SALES ANALYTICS

▮ Track:

- Deals in pipeline
 - Deals won
 - Deals lost
-

Metrics:

- Conversion Rate (%)
 - Average Deal Size
 - Sales Cycle Time
-

☐ Salesperson Performance:

- Leads handled
 - Deals closed
 - Revenue generated
-

☐ 4. CLIENT ANALYTICS

Track:

- Total Active Clients
 - New Clients this month
 - Churned Clients
-

Metrics:

- Client Lifetime Value (LTV)
 - Retention Rate
 - Revenue per client
-

💡 Helps you:

🔗 Focus on high-value clients

⚙️ 5. PROJECT / WORK ANALYTICS

Track:

- Total Projects
 - Completed Projects
 - Ongoing Projects
-

Task Metrics:

- Tasks completed
 - Delayed tasks
 - On-time delivery %
-

Insights:

☞ Which service is delayed most

☞ Which team is slow

6. EMPLOYEE PERFORMANCE ANALYTICS

Per Employee:

- Tasks assigned
 - Tasks completed
 - Completion rate (%)
 - Delay count
-

Identify:

- Top performer
 - Underperformer
-

Advanced:

- Revision rate
 - Work quality score
-

💰 7. REVENUE ANALYTICS

Track:

- Total Revenue
 - Monthly Revenue
 - Service-wise Revenue
-

Example:

- Meta Ads → ₹5L
 - Websites → ₹2L
-

Insights:

🔍 Which service makes most money

📦 8. PAYMENT ANALYTICS

Track:

- Paid invoices
 - Pending invoices
 - Overdue payments
-

Metrics:

- Collection efficiency (%)

- Average payment delay
-

💡 Helps improve cash flow

9. BRANCH-WISE ANALYTICS (VERY IMPORTANT)

Track per branch:

- Leads
 - Sales
 - Revenue
 - Clients
 - Performance
-

Compare:

📊 Bangalore vs Vizag vs Hyderabad

Insights:

📊 Which branch is strongest

📊 Where to improve

10. MARKETING PERFORMANCE ANALYTICS

Track:

- Ad Spend
 - Leads Generated
 - Cost per Lead
 - ROI
-

Platform-wise:

- Meta Ads performance
 - Google Ads performance
-

💡 This is useful for:
👉 Your clients + your agency

11. CUSTOM REPORT GENERATION

CRM should allow:

- Export reports (PDF / Excel)
 - Filter by:
 - Date
 - Branch
 - Service
 - Employee
-

Example:

👉 “March revenue report – Bangalore”

12. REAL-TIME VS PERIOD REPORTS

Real-Time:

- Live dashboard

Period-Based:

- Daily
 - Weekly
 - Monthly
-

13. AUTOMATED REPORTS

CRM should auto-send:

- Monthly client reports
 - Weekly performance summary
 - Payment summary
-

Channels:

- Email
 - WhatsApp
-

14. VISUAL DASHBOARDS (VERY IMPORTANT)

Use:

- Charts
 - Graphs
 - Progress bars
-

Examples:

- Revenue graph
 - Lead source pie chart
 - Employee performance bar chart
-

💡 Makes data easy to understand

15. ROLE-BASED REPORT ACCESS

- Admin → All data
 - Manager → Branch data
 - Employee → Limited stats
 - Client → Only their reports
-

16. COMPLETE WORKFLOW (REAL EXAMPLE)

📅 Month End:

1. CRM collects all data
 2. Generates reports
 3. Shows:
 - Revenue
 - Leads
 - Performance
 4. Sends client reports
 5. You analyze growth
-

IMPORTANT RULES (VERY IMPORTANT)

- ✗ Don't run business without data
- ✗ Don't depend on guesswork

- ✓ Every number tracked
 - ✓ Every branch compared
 - ✓ Every employee measured
-

FINAL STRUCTURE

Leads → Sales → Clients → Work → Payments → Analytics → Decisions

PRO TIP (FOR DIGITALNESS SCALE)

Start simple:

Phase 1:

- Revenue
- Leads
- Payments

Phase 2:

- Employee + work analytics

Phase 3:

- Advanced dashboards + automation

BIG FLOW (MULTI-BRANCH SYSTEM)

 Your CRM should operate like this:

Branch Created → Teams Assigned → Leads Distributed → Clients Managed → Work Executed → Payments Tracked → Reports Compared

1. BRANCH MASTER MANAGEMENT

Purpose:

Create and manage all branches centrally

☐ Branch Profile (Inputs)

Each branch must have:

- Branch ID (Auto)
 - Branch Name (Bangalore / Vizag / Hyderabad)
 - City
 - Address
 - Contact Number
 - Branch Manager
 - Status (Active / Inactive)
-

Example:

- Bangalore Branch
 - Vizag Branch
 - Hyderabad HQ
-

2. BRANCH TEAM STRUCTURE

Each branch should have:

- Sales Team
 - Marketing Team
 - Creative Team
 - Tech Team
-

Employee Mapping:

Every employee must be linked to:

↳ Branch + Role

Example:

Designer → Bangalore

Sales → Vizag

☐ **3. LEAD DISTRIBUTION SYSTEM**

Auto Assignment Logic:

- Lead City = Bangalore → Bangalore team
 - Lead City = Vizag → Vizag team
-

Manual Override:

↳ Admin can assign leads to any branch

Track:

- Leads per branch
 - Conversion per branch
-

☐ **4. CLIENT BRANCH MAPPING**

Each client must be tagged:

- Branch
 - Account Manager
-

Purpose:

☞ Know which branch handles which client

⚙️ 5. PROJECT & WORK DISTRIBUTION

✈️ Task Allocation by Branch:

- Bangalore clients → Bangalore team
 - Vizag clients → Vizag team
-

🔄 Cross-Branch Option:

☞ You can assign:

- Vizag designer → Bangalore client
-

💡 Useful when:

- Workload imbalance
 - Specialized skill needed
-

💰 6. BRANCH-WISE BILLING SYSTEM

Track per branch:

- Revenue
- Invoices

- Payments
 - Pending dues
-

Example:

- Bangalore → ₹5L revenue
 - Vizag → ₹2L revenue
-

7. BRANCH PERFORMANCE DASHBOARD

You (Admin) should see:

Per Branch:

- Leads
 - Sales
 - Revenue
 - Active Clients
 - Pending Payments
-

Comparison View:

🔍 Bangalore vs Vizag vs Hyderabad

💡 Helps you:

- Identify top branch
 - Fix weak branch
-

8. EMPLOYEE CONTROL PER BRANCH

Track:

- Employees per branch
 - Performance per branch
 - Workload
-

Example:

Bangalore:

- 5 designers
- 3 marketers

Vizag:

- 2 designers
 - 1 marketer
-

9. ROLE-BASED ACCESS (VERY IMPORTANT)

Access Levels:

Admin (You)

- All branches access
-

Branch Manager

- Only their branch data
-

Employee

- Only assigned tasks
-

💡 Prevents confusion + data misuse

10. NOTIFICATION CONTROL

Notifications should be:

- Branch-specific
 - Role-specific
-

Example:

- Bangalore task → only Bangalore team notified
-

11. CENTRALIZED CONTROL PANEL (YOUR SCREEN)

🔑 One dashboard to control everything:

You should see:

- Total company revenue
 - Branch-wise revenue
 - Total leads
 - Total clients
 - Overall performance
-

💡 **This is your CEO dashboard**

12. SCALABILITY SYSTEM (VERY IMPORTANT)

CRM should allow:

- Add new branch easily
 - Assign team instantly
 - Start operations quickly
-

Example:

☞ Tomorrow you open Chennai:

- Add branch
 - Assign manager
 - Start leads
-

13. DATA FILTERING SYSTEM

Filter everything by:

- Branch
 - Date
 - Service
 - Employee
-

Example:

☞ “Show Bangalore revenue for March”

🔄 14. CROSS-BRANCH COLLABORATION

Features:

- Assign tasks across branches
- Share resources
- Central communication

💡 Makes team flexible

□ 15. STANDARDIZATION SYSTEM

Ensure all branches follow:

- Same workflow
- Same task structure
- Same reporting format

💡 This is VERY IMPORTANT for scaling

🔄 16. COMPLETE WORKFLOW (REAL EXAMPLE)

📍 Lead from Bangalore

1. Lead enters CRM

2. Assigned to Bangalore sales
 3. Converted to client
 4. Client tagged → Bangalore
 5. Project created
 6. Tasks assigned to Bangalore team
 7. Work completed
 8. Payment tracked under Bangalore
 9. Report generated
-

IMPORTANT RULES (VERY IMPORTANT)

- ✗ Don't run branches independently
- ✗ Don't lose centralized control

- ✓ One system for all branches
 - ✓ Standard process everywhere
 - ✓ Central monitoring
-

FINAL STRUCTURE

Branch → Team → Leads → Clients → Work → Payments → Reports → Control

PRO TIP (FOR DIGITALNESS FUTURE)

If you build this properly:

☞ You can scale to:

- 5 branches
- 10 branches
- Franchise model

1. COMPLETE CRM SYSTEM NAME

Digitalness OS (Internal CRM System)

☞ Purpose: Run entire agency operations from one system

□ 2. CORE MODULE ARCHITECTURE

Your CRM will have these **8 core modules**:

1. Lead & Sales
 2. Client Management
 3. Project & Task Management
 4. Employee Management
 5. Client Communication Portal
 6. Payment & Billing
 7. Reports & Analytics
 8. Multi-Branch Control
-

🎨 3. UI/UX DESIGN (FIGMA-STYLE STRUCTURE)

☰ MAIN SIDEBAR MENU

- Dashboard
 - Leads
 - Sales Pipeline
 - Clients
 - Projects
 - Tasks
 - Employees
 - Payments
 - Reports
 - Branches
 - Settings
-

DASHBOARD (CEO VIEW)

Top Cards:

- Revenue (Monthly)
- Leads Today
- Deals Closing
- Pending Payments

Graphs:

- Revenue trend
 - Lead sources
 - Branch comparison
-

LEADS SCREEN

Layout: Table + Filters

Columns:

- Name
- Phone
- Source
- City
- Status
- Assigned To

 Right side: Lead detail panel

SALES PIPELINE (KANBAN UI)

Columns:

- New
- Contacted
- Qualified
- Proposal
- Negotiation
- Won / Lost

☞ Drag & drop deals

CLIENT PANEL

Tabs:

- Overview
 - Services
 - Projects
 - Payments
 - Files
 - Communication
-

PROJECT / TASK BOARD

☞ Kanban View:

- Pending
- In Progress
- Review
- Completed

☞ Each task card shows:

- Title
 - Client
 - Assigned employee
 - Deadline
-

EMPLOYEE DASHBOARD

- Today's Tasks
 - Pending Tasks
 - Performance %
 - Notifications
-

PAYMENTS SCREEN

- Invoice list
 - Status (Paid / Pending)
 - Filters (branch / date)
-

CLIENT PORTAL UI

Client sees:

- Dashboard
 - Services
 - Tasks
 - Files
 - Chat
 - Tickets
-

4. DEVELOPER SRS (SYSTEM REQUIREMENTS)

◆ Tech Layers:

Frontend:

- React / Next.js

Backend:

- Node.js / Laravel

Database:

- PostgreSQL / MongoDB

Hosting:

- AWS / Vercel

◆ Core Functional Logic

Lead Flow:

Lead → Assigned → Follow-up → Converted

Client Flow:

Client → Services → Projects → Tasks

Task Flow:

Task Created → Assigned → Updated → Completed

Payment Flow:

Invoice → Sent → Paid → Receipt

⚙ 5. AUTOMATION FLOW DIAGRAM (LOGIC)

🔄 AUTOMATION SYSTEM

Flow 1:

Lead Created
→ Auto assign salesperson
→ Create follow-up

Flow 2:

Deal Won
→ Create client
→ Create project
→ Create tasks
→ Assign team

Flow 3:

Task Deadline Near
→ Notify employee

Flow 4:

Payment Due
→ Send reminder

6. SALES SCRIPT (FOR YOUR TEAM)

FIRST CALL SCRIPT

“Hi [Name], this is from Digitalness.
We help businesses generate qualified leads using Meta & Google Ads.

I checked your business — I have a few ideas to improve your leads.
Can we schedule a quick 15-minute call?”

FOLLOW-UP SCRIPT

“Hi, just following up on our last discussion.
We prepared a quick strategy for your business growth.

Can I share it with you?”

💰 CLOSING SCRIPT

“We don’t just run ads — we focus on results.
Let’s start with a small test campaign and scale based on performance.”

📄 7. INVOICE DESIGN (PREMIUM STYLE)

Layout:

Header:

- Digitalness logo
 - Address
 - GST
-

Client Details

Table:

- Service
 - Amount
 - GST
 - Total
-

Footer:

- Payment details
 - UPI QR
-
-

➡📱 8. PAYMENT REMINDER WHATSAPP SCRIPTS

Before Due:

“Hi, your invoice of ₹XX is due tomorrow. Kindly process.”

Overdue:

“Reminder: Your payment of ₹XX is pending. Please clear at the earliest.”

☐ 9. TECH STACK SUGGESTION (IMPORTANT)

☐ Option 1: Custom Build (BEST FOR YOU)

- Full control
- Scalable
- Cost: Medium

👉 Recommended for Digitalness

☐ Option 2: Zoho CRM

- Quick setup
 - Limited flexibility
-

☐ Option 3: No-Code

- Bubble / Airtable

- Fast MVP
 - Limited scale
-

MY RECOMMENDATION:

☞ Start with **No-code MVP** → **then Custom Build**

10. FINAL CRM ARCHITECTURE

Lead → Sales → Client → Project → Task → Employee → Update → Payment → Report

FINAL ADVICE (FOUNDER LEVEL)

Madhu, this is important:

☞ Don't just build CRM

☞ Build a **system your team cannot work without**

Golden Rule:

“If it's not in CRM → it didn't happen”
